Game Play Description

First Phase

2 Players with their own map, which has hiding places for objects .

Both of them has to hide them in 1:30 time mark , 3 items .

Times up , each player transported to their opponent map , has to look for the items .
time limit 2 minutes .

Who ever found 3 objects win first phase.

Second Phase

After the first phase and we got the winner , both players transported to a new map , with 3 shrines randomly spawned . The winner become the hider who has to placed the objects he found in the 3 randomly placed shrines to win . The loser in first round become the seeker , and has to chase and catch hider to win .

Game Mechanic

First Phase

10 or 15 predefined hiding places on map , player can choose freely to place them .

Game start , they have a shovel icon button that has 3 seconds cooldown , they can dig up

place to look for them .

Second Phase

The Map Will be Night with raining constantly

Hider : Has a flashlight that can view an angle of 3 tiles , can run with a cooldown ,

Seeker , cannot see , but the lighting strike every 5 sec and you can see the hider place for 2 or 3 secs . and also has echo location ability with cooldown , that can sense hider location .

Speed boost for both player during lighting strike , but the seeker got a higher boost .

Add on :

The three objects you have to hide will be randomized by algorithm and the hider has to use those during hunt ,

Flashlight as a item cannot be removed ,

Rubber Shoes, which will let seeker hear the shoes sounds

Snowball, to throw at seekers to slowdown

Alarm , that can go off at any time that will give hider position

Dummy toy , that can give misinformation to seeker .
